

**PERMISSION TO DISTRIBUTE TRANSCRIPT DATA  
THROUGH TALKBANK  
Carnegie Mellon University**

Carnegie Mellon University is participating in a data-sharing program known as TalkBank that was established through federal and foundation grants. For the program to function properly, many contributors will be asked to and will give permission for their work to be made available to other researchers. With a full understanding of the aforementioned, I hereby give permission to Brian MacWhinney, Director of the Center of the Child Language Data Exchange System at Carnegie Mellon University, to make and circulate electronic copies of the language transcripts and media that I describe below. These copies may be distributed to scholars and other responsible parties. I warrant that this use of the data is in accord with Human Subjects review procedures at my institution. I also warrant that there is no copyright restriction over the transcripts and media being circulated. Any further restrictions that I wish to place on the use of these data are listed under (2) below. I do not hold Brian MacWhinney or Carnegie Mellon responsible for the enforcement of these further restrictions and indemnify and render harmless both Brian MacWhinney and Carnegie Mellon University against any actions at law or in equity or in similar courts of any jurisdictions arising from violations of these restrictions.

1. General description of the data set.

These are transcripts of maternal infant directed speech to a group of 10 typically developing infants and 9 infants at genetic risk of autism, aged between 3 and 12 months with one follow-up visit at 18 months. All mothers speak Hiberno-English.

2. Restrictions to be placed on the use of the data:

We would be very grateful to receive notice of studies and articles using this corpus.
