

**PERMISSION TO DISTRIBUTE TRANSCRIPT DATA
THROUGH TALKBANK
Carnegie Mellon University**

Carnegie Mellon University is participating in a data-sharing program known as TalkBank that was established through federal and foundation grants to Brian MacWhinney at Carnegie Mellon. For the program to function properly, contributors will be asked to and will give permission for their work to be made available to other researchers. With a full understanding of the aforementioned, I hereby give permission to TalkBank to make and circulate electronic copies of the language transcripts and media that I describe below. These copies may be distributed to scholars and other responsible parties. I warrant that this use of the data is in accord with Human Subjects review procedures at my institution and that participants have given informed consent to have their data available to researchers. I also warrant that there is no copyright restriction over the transcripts and media being circulated. Any further restrictions that I wish to place on the use of these data are listed under (2) below. I do not hold Brian MacWhinney or Carnegie Mellon responsible for the enforcement of these further restrictions and indemnify and render harmless both Brian MacWhinney and Carnegie Mellon University against any actions at law or in equity or in similar courts of any jurisdictions arising from violations of these restrictions.

1. General description of the data set, and IRB Approval # (if available):

The *Mireia-Eva-Pascual* corpus in CHILDES includes transcripts from three Catalan speaking siblings.

This corpus contains data that were videotaped by Mireia Llinàs-Grau and transcribed in CHAT format by several research assistants (Susanna Aspa, Susagna Tubau, Elisabet Pladevall and Maria Rosa Garrido) of the Universitat Autònoma de Barcelona (UAB). It consists of the transcripts of three typically developing Catalan children, two sisters (Mireia and Eva) and a brother (Pascual). Mireia was born on November 10, 1993, Eva on November 21, 1995 and Pascual on July 25, 2000. They are the researcher's three children. They were born and live in Barcelona and the language spoken at home is Catalan, although the children are also exposed to Spanish (TV, cinema, friends) and speak it. Both parents have university education. The recordings were collected at the children's home in natural and daily activities such as taking a bath, having lunch, playing with toys or looking at book pictures.

2. Restrictions to be placed on the use of the data:

The author of the corpus would appreciate being notified and receiving a copy, or a summary, of any work using the data of the corpus.
